MESSAGE FROM THE NEW HEAD OF SCHOOL: PROF. ILANA ELI

THE TEL AVIV UNIVERSITY SCHOOL OF DENTAL MEDICINE (TAUSDM) FOREVER AND EVER

As all of you are probably aware, in recent years the TAUSDM has gone through a painful period of uncertainty with the University seriously considering shutting down the School, in spite of a long line of excellent dental graduates, internship programs and high level research. These times are over!! Only as late as last June, the Committee of Higher Education in Israel and the leaders of Tel Aviv University reached an agreement about the continuing existence of the Dental School, and admission of undergraduate dental students was renewed.

The President of the Tel Aviv University, Prof. Klafter gave a clear commitment that the TAUSDM is here to stay "forever and ever..." In October this year a new class of undergraduate dental students joined our School and I stepped into the position of the Head of School, replacing Prof. Haim Tal.

All this does not mean, of course, that all the problems have been solved. Major changes have to be made in teaching programs, and in the structure and infrastructure of the school.

One of the immediate plans is to increase the number of undergraduate students and the number of residents in the various specialties of dentistry (Periodontics, Endodontics, Oral Rehabilitation, Orthodontics, etc.). We are considering possible collaborations with Health Insurance Companies in Israel and/or with one of the major Medical Centers in the Tel Aviv area. This will enable us to get involved more closely with public service and in the treatment of complex patients. We plan to strengthen the connections with our graduates in Israel and abroad and form a strong Alumni organization which will take a major part in the School's activities.

A big effort is going to be made in order to increase the amount and level of basic and clinical research. The research conducted at our School has reached the highest international scientific level as recognized by prizes awarded to faculty.
members by top level scientific societies and international publications. More PhD students and programs for a joint DMD-PhD degree will allow the best of our students to reach excellence in both clinical and scientific fields and create the next generation of dentists-scientists who will lead the School in the 21st century. We are in great need of scholarships which will allow these students to devote themselves entirely to their studies without constantly worrying about supporting their families.

A lot is to be done. New clinics and laboratories have to be built and new equipment needs to be bought. To reach this goal we need the immediate support of our friends from abroad. Alpha Omega, which has been the main initiator for building the School in the first place, is going to be the main supporter to the reopened TAUSDM in its new, better version. All the experienced faculty members will once again devote their efforts, experience and strength to restore their institution to its former glory. Young faculty members are joining, ready to march TAUSDM to the technology and vision of the 21st century. Friends from around the world are joining hands to once again support this excellent institution and through it to influence level of dental care and dental research in Israel for the decades to come. Wonderful perspectives are opening. We are ready for the challenge!
MESSAGE FROM THE IMMEDIATE PAST HEAD OF THE SCHOOL: PROF. HAIM TAL

WE ARE HERE TO GROW

The decision to reopen the Maurice and Gabriela Goldschleger School of Dental Medicine and to renew the first-year enrollment has turned the class of 2010 into fact. This announcement came after delaying the first-year enrollment for about half a year and after enrollments to other schools and universities had ended. The University’s announcement has restored the School and has reunited it with the University’s other Schools. And this time, it’s forever!

The danger of closing the School derived from a continuous operational deficit related to the Planning and Budgeting Committee’s underbudgeting. About 12 months ago, after the personal intervention of Mr. Gideon Saar, Minister of Education, and Dr. Liora Meridor, Chair of the University’s Executive Council, it was decided to appoint a Committee by the Planning and Budgeting Committee. The Committee’s mandate was to examine the School’s structure, curriculum, and the required costs for its operation. The Committee, headed by Prof. Zeev Tadmor, former President of the Technion, was asked to submit its recommendations as soon as possible. Owing to the complexity of the subject, the work of the Committee lasted many months beyond the planned schedule, and the recommendations were published only at the beginning of May 2010.

The Tadmor Committee determined unequivocally that there is a need for 2 schools in Israel to train about 100 dentists yearly out of the 200 dentists that the health system in Israel is in need of each year. The Committee also agreed that the School is underbudgeted and that the Planning and Budgeting Committee should double the appropriation during the clinical years. Furthermore, the Committee found that despite the School’s excellent facilities and
despite the fact that the maintenance of the facilities is excellent there is an urgent need to upgrade and to renew them. The Committee has declared that the School’s right of existence would remain only if the University maintained a proper academic level, similar to the ones that are found at the other University’s schools. It would be essential to recruit many high-potential and motivated young faculty members who wished to become part of Israel’s medical academic system. This goal would require the national institutions that recognize the importance of the School to increase their financial support. The University and the Planning and Budgeting Committee have made an important step toward this direction.

The justification for the School is not only a statistical issue. The need for Israeli dentists stems from the country’s obligation to train dentists whose professional ability will set the level in Israel and who will lead the group that is responsible for offering proper health services to Israelis. Within several years, Israel is expected to face a shortage of dentists in general and Israeli graduates in particular. The existence and the strength of the School are not derived from its financial health. The School’s strength depends on its academic status, the research level, teaching, innovation, and uniqueness. If these justify its existence, the other problems will be solved. The Planning and Budgeting Committee and the University have adopted the Tadmor Committee’s recommendations and Tel Aviv University is ready to implement them promptly. The School’s faculty that has already presented pioneering willingness and volunteering spirit along with endless devotion for the School’s existence is also ready to join this mission. I certainly hope that everyone who works in favor of the School will know how to breathe back life into the School.

In summary, I would like to thank many fine people who have contributed to our efforts and led us to success, including Mr. Gideon Saar, the Minister of Education, Prof. Zeev Tadmor and his Committee members, Dr. Liora Meridor, former Chair of the University’s Executive Council, Prof. Joseph Klafter, President of Tel Aviv University, Prof. Dany Leviatan, former Rector, Mr. Motti Kohn, General Manager of Tel Aviv University, Prof. Yossi Mekori, Dean of the Faculty of Medicine, Dr. Itzak Chen, Chair of I.D.A, Prof. Ariel Ben-Amar, Head of the Union of the School’s Faculty and the School’s academic and administrative staff. Finally, I would like to convey special thanks to our students who went along with us the whole way.
June 27, 2010

Professor Haim Tal
Head of the Goldschleger School of Dental Medicine
Tel Aviv University
Ramat Aviv, 69978, Tel Aviv
Israel,

Dear Haim,

We have just received the good news that the TAU Goldschleger School of Dental Medicine, Founded by Alpha Omega will open this Fall accepting students for their first and fourth year studies. This news obviously puts aside the severe concerns that the school was in jeopardy of closing its doors, and opens new doors to continue the teaching and research excellence that it once exhibited.

Please accept the gratitude of the Alpha Omega Foundation, the philanthropic arm of the Alpha Omega International Dental Fraternity, for the strong leadership you offered to bring about this happy conclusion. Also to be applauded are the efforts and support of TAU President Joseph Klafter, Dean Yossi Mekori (Sackler School of Medicine), those supporters in the University Administration, as well as officials of the Israeli Government.

There is an old adage, “Success has many sires…..failure is an orphan”! On that note, we wish to further acknowledge the input of the School’s Dental Advisory Board, several of whom are Governors of the University. They are Andre Amiach (France), Mervyn Druian (UK), Harold Preiskel (UK), Elisha Ben-Zur and Avi Chesner (both Switzerland), Howard Pranikoff, Gerald Niznick, Stan Bergman, Steve Kess. Norman Mohl, Leo Sreebny, Ralph Rothstein, Ben Williamowsky (all of the USA). We are likewise grateful to the blue ribbon commission appointed to study and help resolve the problems that stood in the way for this “new beginning” for the School. It included Dean Adam Stabholz and Professor Ari Steyer of Hadassah School of Dental Medicine, likewise founded by Alpha Omega. We trust that all will continue to support whatever new faculty leaders are chosen to lead this excellent institution of learning.

Alpha Omega reinforces its commitment to forge ahead with its campaign, “The Future is Now” in support of the School of Dental Medicine.

Sincerely,

Ben Williamowsky
Ralph Rothstein
Directors, Alpha Omega Foundation
On November 12th, 2010, an official "change of guard" ceremony took place, in which Prof. Haim Tal finished his term as the Head of School and was replaced by Prof. Ilana Eli. The ceremony was honored by the presence of the immediate past Rector of Tel Aviv University, Prof. Dan Leviatan and the Dean of the Faculty of Medicine, Prof. Yoseph Mekori, both of whom congratulated Prof. Haim Tal for his excellent work and achievements. Prof. Haim Tal summarized his term and thanked the various members of faculty and administrative staff who assisted him in his job. Prof. Ilana Eli, the new Head of School, thanked Prof. Tal for his efforts to assure the continuing existence of the Dental School at TAU and presented him with a certificate of appreciation for his long lasting endeavors for dentistry and dental care in Israel and for the Dental School.
HemCon® – Stops bleeding.

HemCon Dental Dressing is self-adhesive and self-dissolving.
After one minute – the bleeding has stopped.
After 48 hours – dressing has dissolved*.

NEW!

- Faster hemostasis
  Bleeding is controlled in less than 1 minute**, compared to 9.53 minutes for conventional dressings.

- Effective pain relief
  Creates a physical barrier to protect the wound from irritation.

- How it works
  Attracts red blood cells and platelets to the dressing, forming a coagulum that seals the wound.

* The dressing usually dissolves within 48 hours. In some cases, this may take up to seven days.

©2010 Zimmer Dental Inc., 2364, Rev. 4/13. HemCon is a registered trademark of HemCon Medical Technologies, Inc. HemCon Dental Dressing is manufactured by HemCon Medical Technologies and distributed by Zimmer Dental Inc. Please note that not all products and regenerative materials are registered or available in every country. Please check with a Zimmer Dental representative for availability and additional information.

CEREMONY OF RECEIVING THE WHITE COAT

In an impressive ceremony held at the Maurice and Gabriela Goldschleger School of Dental Medicine founded by Alpha Omega International and the Tel Aviv branch, white coats were presented to 4th year students upon their entering the clinical world in which they will start to treat patients.

Mr. Meir Shitrit M.P, in the past Minister of Health, Minister of the Interior, Minister of Education and Minister of Finance, attended the ceremony.

Member of Parliament Shitrit received a white coat and congratulated the 4th year students on their joining the clinical studies and lectured the participants about the biometric law in Israel, initiated by him and recently approved at the Knesset plenary.

President of Alpha Omega Israel Dr. David Ash grants the Alpha Omega pin to Dr. Shahar Blachash.

ON BEHALF OF THE COMMUNITY
ORTHODONTIC AND RESTORATIVE TREATMENT WILL BE GIVEN TO 150 CHILDREN AT THE TEL AVIV UNIVERSITY DENTAL SCHOOL WITH THE ASSISTANCE OF THE “LOTUS ROAD” ASSOCIATION

A cooperation agreement was recently drawn up between the “Lotus Road” association, a public welfare company and philanthropic association set up by Mr. Ilan Ben Dov, and the Dental School founded by Alpha Omega at Tel Aviv University.

In the framework of the undertaking by the dental school and the departments of orthodontics and pediatric dentistry to take care of the oral and dental health of Israeli children, particularly the underprivileged, a cooperation agreement was signed, defining the right of 150 children and youngsters in this group to receive orthodontic and conservative treatment at the Tel Aviv University Dental School. The dental treatments will be financed by the “Lotus Road” association.

“We will extend the most professional and cordial treatment to the children coming to us” said Prof. Haim Tal, former Head of the Dental School.

On Thursday 25 February 2010 150 children accompanied by the General Manager of the “Lotus Road” association, Mr. Koby Wiesel, arrived at the Dental School.
VISIT BY DR. CHARLENE BERKMAN, PRESIDENT OF ALPHA OMEGA INTERNATIONAL

In June the President of Alpha Omega International Dr. Charlene Berkman, accompanied by Dr. Shahar Blachash, Chairman of the Alpha Omega Tel Aviv branch, visited us. Dr. Brekman toured the school and met senior staff members and students. Dr. Brekman described the birth of Alpha Omega to the students and stressed the importance of the fraternity in the present as well. She encouraged the students to join Alpha Omega and participate in all its activities.

VISITORS TO THE SCHOOL

VISIT BY PROF. JONATHAN L. FERENCZ

On 22.4.10 a study day was held at the Dental School on the subject of “Clinical applications of reinforced porcelain for the restoration of teeth and implants”. The study day was given by Prof. Jonathan L. Ferencz, Past President of the American College of Prosthodontics, who presently serves as clinical professor in the postgraduate program in oral rehabilitation at NYU. Among the many participants were staff members of the Department of Oral Rehabilitation and other departments, as well as residents specializing in oral rehabilitation of Tel Aviv University, the Hebrew University and Hadassa and the specialization program of the IDF at Tel Hashomer.

The study day was organized by Dr. Shifra Levartovsky who is in charge of postgraduate studies in oral rehabilitation at our school.

In the first part of his presentation, Prof. Ferencz gave a survey of the aesthetic principles, with emphasis on coordination with the patient’s expectations. Subsequently, the zirconic and alumina crown creation process on teeth was examined at the CAD/CAM method and the existing research on the subject. The clinical stages of the application were also examined, as well as possible complications. In the second part of the day Prof. Ferencz surveyed the application on implants, from zirconic structures to restoration of a single frontal implant, striving to create the right architecture of the gums. Prof. Ferencz also surveyed the differences between screwed zirconic restorations compared to glued restoration of implants. The lectures were accompanied by many examples of clinical cases, the vast material was presented in a clear and accurate manner and introduced those taking part in the study day to the many facets of this important clinical niche in a comprehensive and profound way.

STUDENTS OF THE UNIVERSITY OF HONG KONG VISIT THE SCHOOL

Three last year students of the dental school of the University of Hong Kong visited our school. They spent three days at the school in the framework of students’ exchanges and observed the students’ clinics and post graduate students specializing at the departments of periodontics, pediatric dentistry and orthodontics.

The Hong Kong students were impressed with the high level of teaching provided at the TAU Dental School both to undergraduate and to post graduate students.
SEVEN NARROW Ø3.30mm

MIS is proud to introduce the new addition to our SEVEN implant range: the SEVEN 3.30mm Narrow platform. This new Seven 3.30mm implant will be supplied in varying lengths of 10mm, 11.5mm, 13mm and 16mm. MIS SEVEN Narrow implant is especially designed for narrow ridges and tight spaces and is accompanied by a variety of prosthetic options specifically designed for this platform.
Legacy™3 All-in-1 Packaging
INCLUDES: Cover Screw, Healing Collar, Transfer and Straight Preparable Abutment. Surgically and Prosthetically Compatible with Zimmer's Tapered Screw-Vent®

Legacy™3

Three Implant Designs and Packaging Options
Original Conical Connection (GNiznick US Pat.#4,960,381)
Implants include Cover Screw and Healing Collar
Select Implant based on Price, Packaging and Thread Design

Legacy1: includes Plastic Carrier
Legacy2: includes Temporary Abutment/Transfer
Legacy3: includes Preparable Abutment/Transfer

Legacy1
Standard “V” Threads
Matches Screw-Vent

Legacy2
Spiral Threads
for Increased Stability

Legacy3
Buttress Threads
for Increased Surface

Prosthetic compatibility with Screw-Vent, BioHorizons® and MIS Implants

A delegation of Alpha Omega France divisions, headed by André Amiach, President of the Rhone Alpe branch, visited the school and brought a gift of surgical and perio-surgical equipment for the school on the occasion of the inauguration of a number of treatment rooms on the site of the clinics named after Reesa and Dr. Gerald Niznick.

The ceremony opened with a speech by the President of the University, Prof. Yossi Klafter, who gave his assurance that it was his fervent wish to see the ongoing existence of the School and its re-establishment on a firm basis. In the course of the event the treatment rooms were inaugurated and named after Alpha Omega branches which donated the equipment to the rooms: Paris branch, Lyon-Rhone Alpe branch and Loraine branch. After the cloth was withdrawn from the various signs of the rooms, Dr. Amiach lectured on implantology treatments and various bone treatments, and presented the donation of the medical equipment he had brought along as a donation to the school-piesosurgical appliances of the Acteon Dental Supply company. In addition, a treatment room was inaugurated named after ETI Industries Ltd. Company.

From right to left: Prof. Tal, Mr. Zvi Bogen, representative of Acteon company and Dr. Amiach.

Dr. Sydney Boublil (left) and Dr. André Amiach
In October 2010, Dr. Amiach paid another visit to the School, bursting with enthusiasm and new ideas. He met with senior faculty members and discussed future plans of continuous education for both Israeli and European dentists. One of the immediate plans is to organize a joint Tel Aviv-Jerusalem-France meeting in which guest lecturers from France will join senior lecturers from the Tel Aviv Dental School and from Haddasah, Jerusalem for a joint meeting.
APPOINTMENTS AND PROMOTIONS AT THE SCHOOL

- **Prof. Meiron Weinreb** received the degree of Full Professor of Oral Biology
- **Prof. Avi Hirschberg** received the degree of Associate Professor of Oral Pathology
- **Prof. Rafi Pilo** received the degree of Associate Professor of Dental Biotechnology
- **Prof. Gabi Chaushu** received the degree of Associate Professor of Oral and Maxillofacial Surgery
- **Prof. Ofer Moses** received the degree of Clinical Associate Professor of Periodontology
- **Dr. Noam Yarom** received the degree of Lecturer of Oral Medicine
- **Dr. Anda Kfir** received the degree of Lecturer in Endodontology
- **Dr. Nir Shpack** received the degree of Lecturer of Orthodontics
- **Dr. Zeev Ormianer** received the degree of Lecturer of Oral Rehabilitation
- **Dr. Gabriel Gal** received the degree of Clinical Lecturer of Oral and Maxillofacial Surgery
- **Dr. Yifat Manor** received the degree of Clinical Lecturer of Oral and Maxillofacial Surgery
STUDY GRANT OF THE LATE ZAIDA ZANZIPER FUND

In a modest ceremony held on 9/6/2010, Prof. Haim Tal extended a grant for the 2009/2010 study year in the sum of NIS 10,000 to 6th year student Otilia Karp.

The grant is financed by a fund set up a year ago at the bequest of the late Zaida Zanziper whose attachment to the Dental School derives from the fact that her late mother, who perished in the Holocaust, was a dentist and also because her grandson, Dr. Eran Zanziper, who presently specializes in oral rehabilitation, continues in the same academic line.

The ceremony was attended by Prof. Haim Tal, Mr. Haim Naor, Head of Administration, Mrs. Michal Arbel, School's secretary, and the student Otilia Karp. On behalf of the family, the late Zaida Zanziper's children attended – her daughter, Prof. Eliora Ron, of the Microbiology Department at TAU and her son, Mr. Menahem Zanziper. Menahem congratulated Otilia and spoke about his mother, focusing on the generosity that characterized her life. Two of Mrs. Zanziper’s grandchildren also attended the ceremony – Ms. Michal Ron and Dr. Eran Zanziper.

NEWS FROM THE DEPARTMENT OF ORTHODONTICS:
PROF. MIRON LIEBERMAN TURNS 80!

In November 2010, Prof. Miron Lieberman turned 80.

Prof. Lieberman is one of the "founding fathers" at the School of Dental Medicine in TAU in general and of the Department of Orthodontics at our School in particular. An eternal youngster, Prof. Lieberman is continuously active in teaching the post graduate students' program in orthodontics and has been running a course on case presentation in orthodontics for the past 37 years.

The Department of Orthodontics organized a moving ceremony during which Prof. Vardimon, the Head of the Orthodontic Department congratulated Prof. Lieberman for his achievements and presented him with a replica of the famous statue "The Thinker" by August Rodin.
NEWS FROM THE DEPARTMENT OF MEDICINE AND ORAL PATHOLOGY:
HONORARY LIFE MEMBERSHIP OF THE INTERNATIONAL ASSOCIATION OF ORAL PATHOLOGISTS

Honorary Life Membership is the highest award conferred by the International Association of Oral Pathologists (IAOP). The award was presented to Prof. Buchner at the 2010 IAOP scientific meeting in Seoul, South Korea.

At the same meeting Dr. Marilena Vered presented a study on tumor markers in aging salivary glands. In addition, Dr. Vered participated in the prestigious meeting of the American Association for Cancer Research (AACR) in Philadelphia, USA, on Metastasis and the Tumor Microenvironment, where she presented a study on tongue cancer. This year Dr. Vered received the Rector of Tel Aviv University award for outstanding teaching.

Dr. Noam Yarom was invited to join an international group of specialists for the revision of the questionnaire on quality of life of head and neck cancer patients, which operates under the auspices of the European Organization of Research and Treatment of Cancer.
The International College of Dentists (ICD) is a global honorary society that recognizes dentists in over 100 countries who have made significant contributions to their profession and fellow man. For the last six years, the Israeli chapter of the ICD has presented a Student Prize to the graduating dental students at each dental school who best represent the values and principles of the International College. This year the Tel Aviv University School of Dental Medicine awardee was Adar Mann. The Prize, sponsored by the GC Europe Company, was presented during the annual Goldshleger Research Forum by Dr. Dov Sydney, Editor of the International College of Dentists, European Section and Regent for Israel.

Adar Mann (Middle) receives the student Award from Dr. Dov Sydney (left) of the International College of Dentists, Ms. Gal Shelly of GC company (Right) and Prof. Ilana Eli (from right).
Continuing the tradition of the annual meeting devoted to dental research, the forum took place in the Sigma Epsilon Delta auditorium.

The topic this year’s forum was "Updates in modern medicine and dentistry" and it was organized and coordinated by Prof. Carlos Nemcovski.

Following greetings by Prof. Ilana Eli, Head of the School, Dr. Dov Sydney, awarded the Student Award of the International College of Dentists to Adar Mann, a 6th year DMD student.

The Yocheved and Dr. Daniel Sarnat awards for outstanding DMD dissertations were awarded to Drs. Dana Piek, Pessia Rubin and Asaf Hendler.

Dr. Sigalit Blumer, Anda Kfir, Ora Gross, Eran Dolev and Esther Rosenberg received the distinguished teacher certificates.
The Forum was honored by the presence of Prof. Daniel Aberdam, the Director of INSERAM Faculty of Medicine, Nice, France and member of the Rappaport Faculty of Medicine of the Technion, Haifa who gave a lecture on the topic of “Stem cells as cellular models for physiopathology and cell therapy”.

Also in the framework of the forum the various departments at school presented their latest research findings. The lectures were given by: Prof. Zvi Artzi, Prof. Benny Peretz, Dr. Zeev Ormianer, Dr. Rachel Sarig and Dr. Marilena Vered.

Dr. Pessia Rubin (middle) receives the Yocheved and Dr. Daniel Sarnat award for outstanding DMD thesis from Prof. Ilana Eli (left) and Prof. Tamar Brosh (right).

Dr. Dana Piek (middle) receives the Yocheved and Dr. Daniel Sarnat award for outstanding DMD thesis from Prof. Ilana Eli (left) and Prof. Tamar Brosh (right).

Dr. Ester Rosenberg (Middle) receives a certificate of appreciation for being elected outstanding teacher from Prof. Ilana Eli (left) and Prof. Aviad Tamse (right).

Dr. Ora Gross (middle) receives a certificate of appreciation for being elected outstanding volunteer teacher from Prof. Ilana Eli (left) and Prof. Ariel Ben-Amar (right).

Dr Anda Kfir (left) receives a certificate of appreciation for being elected outstanding teacher from Prof Ilana Eli (middle) and Prof. Aviad Tamse (right).
Dr. Sigalit Blumer (middle) receives a certificate of appreciation for being elected outstanding teacher from Prof. Ilana Eli (left) and Prof. Benny Peretz (right)

Audience.
Prof. Ilana Eli graduated in 1976 from the Hebrew University, Jerusalem, and has been member of the faculty at the Maurice and Gabriela Goldschleger School of Dental Medicine since 1978. Prof. Eli is a specialist in Oral Rehabilitation (Prosthodontics), holds a license to practice and teach Clinical Hypnosis and is a full Professor at the Department of Oral Rehabilitation at the Maurice and Gabriella Goldschleger School of Dental Medicine.
Prof. Eli is a worldwide acknowledged expert in psychological and behavioral aspects of chronic and acute pain, behavioral sciences in dentistry and medical hypnosis. Prof. Eli lecturers extensively on these subjects in Israel, scientific meetings, courses and symposia in universities all over the world. Prof. Eli has instructed over 40 students for their DMD thesis, published over 100 scientific papers and serves as a reviewer in numerous top level scientific journals (e.g. Journal of Dental Research, European Journal of Oral Sciences and many others). Prof. Eli is the author of the textbook: “Oral Psychophysiology: Stress, Pain and Behavior in Dental Care” published in 1992 by CRC Press, Inc.
Since 2008, Prof Eli serves as Associate Editor of the prestigious Journal of Orofacial Pain.
